Park Shelter with picnic seating

Timber Viewing Deck

Concrete pathway network directing pedestrian traffic to the 'Woongarra Walk'. Once established, the areas of island plantings within the drainage reserve will provide valuable habitat for local birdlife and be the beginning of future possible wildlife corridor to the Burnett River. Concrete pathways within the park and streetscape will be disabled access compliant. Paths associated with the 'Woongarra Walk' are included for more active use and are not designed for disabled use.
